

# Version 11

Revisions in this release include:

- New Feature: Searching for a crew member: the crew can be selected as the current active leg CA or FO on the Crew Details page.
- New Feature: From Leg > Crew and Leg > Crew > Crew Picker long-press displays a summary of crew data and the option to select or deselect crew from the edited leg.
- New Feature: Added 121.439 Recent landing experience to Legality Detail, Summary, and Alert view. For alert view use (recall) to see your recent landing expire date.
- New Feature: iPad in landscape menu is always displayed
- Updated search menu item. Now at the top of the main menu. Tapping search display's a modal view, allowing you to return to your previous screen.
- Updated alert view and status board with pull to refresh controls.
- Updated layout for APDL Toolkit Safari Extension.
- Updated Logbook (iPad) View updated logpage formatting.
- Updated Berlin Brandenburg Airport (BER) airport.
- Update United Airlines, Inc. in Airline Database.
- Added support for Breeze Airways and Swift Air
- Improved Calendar Sync in iOS 15.
- Improved weather information on Statusboard
- Improved AutoFILL to include aircraft information TAILS
- Improved new user workflow EULA, Onboarding, Settings Checklist, What's New, and Notification Prompting
- Improved Split Window Support, fixed Add Duty Blank Trip when in split view.
- Fixed Logging in and out of multiple accounts or sample mode.
- Fixed Add Duty Period from Trip view.
- Fixed missing flight numbers when flight is closed out on Trip View.
- AutoFill window to locate missing flight information.
- AutoFill when manually selected from Leg Editor will display what changed in the leg in the section footer. Autofill will not change data while editing a leg.
- Airline Picker segments for International and All shows sections data.
- Extended timeouts to improve the reliability of the Check Schedule and Import Trip features.
- Updated graphics.
- Overall stability improvements.

We strongly recommend that after installing APDL 11.0 go to **Settings > Setting Checklist** to review your airline and application settings.

Thank you for choosing APDL - the one and only logbook solution for airline pilots built from the ground up for 14 CFR 117
