

Certificates Options

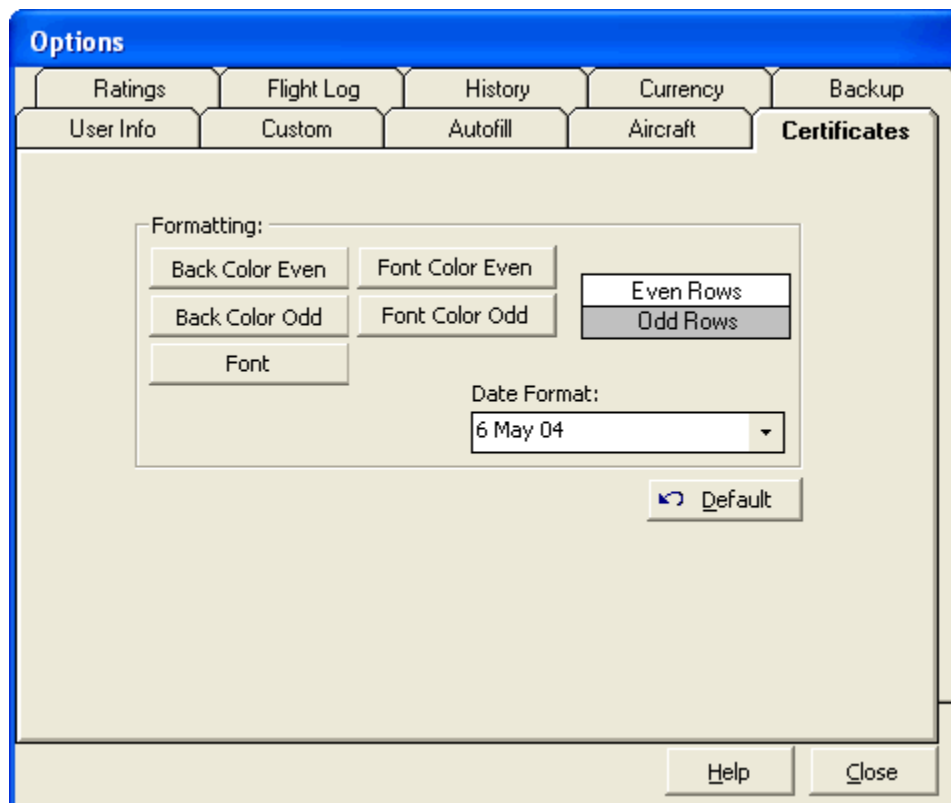

Figure 1. Certificates Configuration

Basic formatting is offered in all data entry areas, as seen by the options above. An example is shown on the right of the configuration of the color and font settings as well as the date format selection for any columns containing date information. Click the buttons to change the color scheme or font settings. Select a date format from the available options in the drop down list. To restore to the default settings, click the Default button in the lower right.
