

# Activating Logbook Pro

Registering Logbook Pro can be accomplished in several easy ways.

Logbook Pro offers a built in self-contained registration system. If Logbook Pro is not running, startup Logbook Pro. The first screen that appears offers several options for registering (Figure 1). If Logbook Pro is running, choose the Register option under the Help menu.

The image shows a Windows-style dialog box titled "NC Software License Activation". It has a blue title bar with a magnifying glass icon on the left and standard window controls (minimize, maximize, close) on the right. The main area has a light beige background. At the top, it says: "Enter your NAME and UNLOCK CODE in the boxes below EXACTLY as issued. It is recommended to copy & paste the information into the boxes below, then activate your license. Please ensure you are connected to the Internet at this time." Below this, there's a section "Select Product to Activate:" with three radio buttons. The first, "Logbook Pro (PC-Full Version)", is selected. The other two are "Logbook Pro Palm Companion" and "Logbook Pro Pocket PC Companion". Below the radio buttons are four text input fields labeled "Name:", "Company:", "Unlock Code:", and "E-Mail Address:". At the bottom, there are three buttons: "Buy Now" (highlighted with a 3D effect), "Evaluate" (in red text), and "Activate" (disabled, in grey text). At the very bottom, there is a small asterisked note: "\*Airline Pilot's Daily Aviation Logbook (APDL) is a separate product not registered within the Logbook Pro Software. Start APDL on your PDA by tapping 'AirlineLog' then Options...Enter Key Code to register."

Figure 1. Registration Dialog

After entering the purchased registration information for Logbook Pro PC, Palm Companion, or Pocket PC Companion products, ensure you are connected to the Internet for a one time activation. Click "Activate" to submit your registration data to NC Software's secure servers and activate your software. The following information is sent to NC software, no other personal data is collected:

Information contained within dialog in addition to computer machine name and your IP address for verification and license compliance purposes.
