

Certificates

The image shows a Samsung smartphone screen with the 'New Certificate' application. The status bar at the top shows various icons including USB, Facebook, a trash can, a minus sign, Wi-Fi, signal strength, 100% battery, and the time 4:10 PM. The app title 'New Certificate' is at the top, with a save icon and a plus icon on the right. The form contains the following elements:

- Grade:** A text input field with the placeholder text 'Grade' and an orange border.
- Number:** A text input field with the placeholder text 'Number'.
- Issued:** A date picker showing 'Wed May 28, 2014' and a blue 'now' button.
- Remarks:** A large text area with the placeholder text 'Remarks'.
- Bypass Calendar:** A checkbox followed by the text 'Bypass Calendar' and the subtext 'Check to prevent adding to the calendar'.
- Synchronized:** A checkbox followed by the text 'Synchronized' and the subtext 'Check to prevent sending to the cloud'.

To enter your Certificate tap "Grade" and enter the name of your certificate. Enter a certificate number (optional) and then tap the date to choose a date from the date picker. You can optionally tap the blue "now" button to enter today's date if it's not already on today. You can optionally enter remarks. When the entry is complete tap SAVE on the upper right. If you are simply viewing an entry or started an edit but wish to back out you can tap "Cancel" on the upper left and nothing will be saved. Not in view above are two options below Remarks; "Bypass Calendar" (if calendar integration is enabled) when checked (tap to check) the app will not make a corresponding entry into your device's calendar. "Synchronized" will be checked if this entry was already synchronized when entered previously and can be used to allow you to enter a new certificate and tap (check) Synchronized and it will not be sent to the cloud and subsequently Logbook Pro Desktop.

New in version 8.5 and later is the combination Save and + button in the upper right of the new item entry screen. Tapping Save will save the entry and close the editor. Tapping + will save and allow for another item to be added.
