

Version 7.0

This is a MAJOR update to Logbook Pro on Apple iOS devices.

- 3D Touch Application Shortcuts
- Split-View and Slide-Over support (iPad Air 2 and later)
- Touch ID or iOS passcode can now be used to protect access to the app
- Auto Night in flight log entries and Schedule Importing
- New Schedule Importer architecture using same system from APDL for more accurate and advanced trip preview, management, and importing
- Improved Social Networking integrations
- Improved data synchronization
- Improved layouts and support for text zooming
- Fixed issues with OOOI (Out/Takeoff/Landing/In) inputs with text zoomed high levels
- Redesigned timezone handling and fixed sync timezone issues
- Various other minor improvements and optimizations
