

Ratings

The image shows a Samsung smartphone screen displaying the 'New Rating' form. The form has a black header with the title 'New Rating' and two icons on the right. Below the header, there is a 'Rating' label and a text input field containing 'Cat / Class / Type'. To the right of the input field is a blue 'now' button. Below this is an 'Issued' label and a date picker showing 'Wed May 28, 2014'. To the right of the date is a circular icon with a green arrow. Below the date is a 'Remarks' label and a large text area for entering remarks. At the bottom of the form are two checkboxes: 'Bypass Calendar' and 'Synchronized', both of which are currently unchecked. Below each checkbox is a small text description: 'Check to prevent adding to the calendar' for 'Bypass Calendar' and 'Check to prevent sending to the cloud' for 'Synchronized'. The top status bar of the phone shows various icons including USB, Facebook, a battery icon, and the time '4:10 PM' along with '100%' battery level.

To enter your Rating tap into the entry field right of "Rating" and enter the name of your rating. Enter the date issued by tapping the date to choose from the date picker or you can optionally tap the blue "now" button to enter today's date if it's not already on today. You can optionally enter remarks. When the entry is complete tap SAVE on the upper right. If you are simply viewing an entry or started an edit but wish to back out you can tap "Cancel" on the upper left and nothing will be saved. "Bypass Calendar" (if calendar integration is enabled) when checked (tap to check) the app will not make a corresponding entry into your device's calendar. "Synchronized" will be checked if this entry was already synchronized when entered previously and can be used to allow you to enter a new rating and tap (check) Synchronized and it will not be sent to the cloud and subsequently Logbook Pro Desktop.

New in version 8.5 and later is the combination Save and + button in the upper right of the new item entry screen. Tapping Save will save the entry and close the editor. Tapping + will save and allow for another item to be added.
